

Zara 02 / zara02

204 individuals · 2,375 native annotation points · 420.48 s coverage

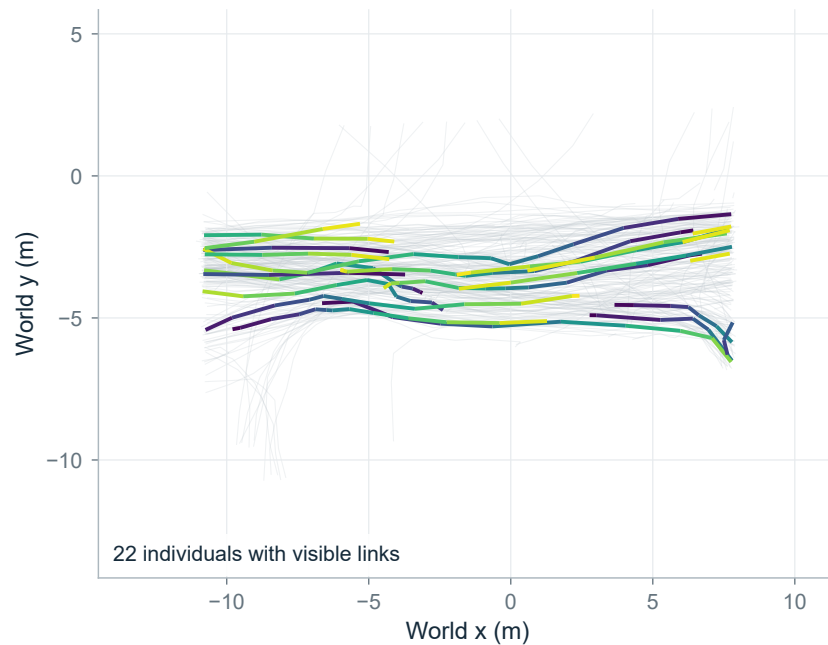

a All individual trajectories

Time since first scene annotation (s)

b 12 s detail | 300–312 s

22 individuals with visible links

Time since detail-window start (s)

Detail: earliest 12 s window maximizing visible individuals on a 1 s grid. Gray: full-scene context.

Links join successive accepted annotations of the same person. UCY links are geometric interpolation, not new observations.
